High Performance Browser Networking: What every web developer should know about networking and web performance Ilya Grigorik

How prepared are you to build fast and efficient web applications? This eloquent book provides what every web developer should know about the network, from fundamental limitations that affect performance to major innovations for building even more powerful browser applications—including HTTP 2.0 and XHR improvements, Server-Sent Events (SSE), WebSocket, and WebRTC.

Author Ilya Grigorik, a web performance engineer at Google, demonstrates performance optimization best practices for TCP, UDP, and TLS protocols, and explains unique wireless and mobile network optimization requirements. You'll then dive into performance characteristics of technologies such as HTTP 2.0, client-side network scripting with XHR, real-time streaming with SSE and WebSocket, and P2P communication with WebRTC.

- Deliver optimal TCP, UDP, and TLS performance
- Optimize network delivery over 3G/4G mobile networks
- Develop fast and energy-efficient mobile applications
- Address bottlenecks in HTTP 1.x and other browser protocols
- Plan for and deliver the best HTTP 2.0 performance
- Enable efficient real-time streaming in the browser
- Create efficient peer-to-peer videoconferencing and low-latency applications with real-time WebRTC transports

From reader reviews:

Ellen Kelsey:

What do you with regards to book? It is not important together with you? Or just adding material if you want something to explain what yours problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to accomplish others business, it is make you feel bored faster. And you have time? What did you do? All people has many questions above. They need to answer that question because just their can do in which. It said that about guide. Book is familiar on every person. Yes, it is appropriate. Because start from on jardín de infancia until university need this High Performance Browser Networking: What every web developer should know about networking and web performance to read.

Don Gonzales:

This High Performance Browser Networking: What every web developer should know about networking and web performance book is simply not ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is usually information inside this book incredible fresh, you will get info which is getting deeper anyone read a lot of information you will get. This High Performance Browser Networking: What every web developer should know about networking and web performance without we recognize teach the one who reading it become critical in imagining and analyzing. Don't become worry High Performance Browser Networking: What every web developer should know about networking and web performance can bring once you are and not make your carrier space or bookshelves' turn into full because you can have it inside your lovely laptop even cellphone. This High Performance Browser Networking: What every web developer should know about networking and web performance having great arrangement in word as well as layout, so you will not really feel uninterested in reading.

Deborah Anderson:

Don't be worry when you are afraid that this book will probably filled the space in your house, you may have it in e-book technique, more simple and reachable. That High Performance Browser Networking: What every web developer should know about networking and web performance can give you a lot of friends because by you looking at this one book you have thing that they don't and make you actually more like an interesting person. This specific book can be one of a step for you to get success. This e-book offer you information that possibly your friend doesn't understand, by knowing more than different make you to be great men and women. So , why hesitate? We need to have High Performance Browser Networking: What every web developer should know about networking and web performance.

Pearl Moore:

As a student exactly feel bored to help reading. If their teacher asked them to go to the library as well as to make summary for some publication, they are complained. Just tiny students that has reading's heart and soul or real their pastime. They just do what the professor want, like asked to the library. They go to right now

there but nothing reading significantly. Any students feel that looking at is not important, boring in addition to can't see colorful photos on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this High Performance Browser Networking: What every web developer should know about networking and web performance can make you truly feel more interested to read.
