Colour Additives for Foods and Beverages (Woodhead Publishing Series in Food Science, Technology and Nutrition)

Colour Additives for Foods and Beverages (Woodhead Publishing Series in Food Science, Technology and Nutrition)

Food colour additives have been the focus of much research in the last few years, and there is increasing consumer demand for natural and safer synthetic colours. This book reviews the natural and synthetic colours available, their properties and applications, as well as regulatory, sensory and analytical issues. Part one covers the development and safety of food colour additives. Part two covers properties and methods of analysis, and part three focuses on specific food product applications and future trends.

- Reviews the natural and synthetic colour additives available for foods and beverages, looking at their properties and applications as well as regulatory, sensory and analytical issues
- Expert analysis of natural origin colours, synthetic origin colours, overview of regulations, safety analysis and consumer health
- Comprehensive coverage of properties and development in food colours: chemical purity, colour stability, and consumer sensory perception
