Ivor Horton's Beginning Visual C++ 6, Installation & Contents Guide Ivor Horton
Visual C++ 6 is the latest incarnation of Microsoft's premier development product for C++ developers. It contains the latest version of the MFC (Microsoft Foundation Classes) which has virtually become the Industry-wide library used to write Windows programs. Visual C++ 6 also contains the Active Template Library 3.0 (ATL) , which is a framework and collection of Wizards for writing ActiveX & COM controls. This book is a tutorial in the use of all the major functions of Visual C++ 6 and comes with a copy of Microsoft's *Visual C++ Introductory Edition* compiler. This is a complete version of Visual C++ 6 that Microsoft have developed to be packaged with tutorial books. The only notable difference between this version and the retail version is that the compiled programs are statically linked, making this the perfect self study learning tool.
