## Da Vinci's REAL Hidden Secrets: The PHI CIRCLE L. A. Braun

Had Leonardo Da Vinci really hidden secrets in his art work? This 2013 book was one of the ORIGINAL books actually illustrating his REAL secrets, the number '26' and the PHI CIRCLE, in many of Da Vinci's paintings (even in three of his most famous paintings - the Mona Lisa, the Madonna of the Rocks, and the Last Supper!). We added a few Addendums to update everyone on our progress with rebus, etc. Although our search through Leonardo Da Vinci's works for embedded secrets had begun with the number '26,' it had then soon launched off into fresh and stirring discoveries. We'd found a number under a rose in the 'Madonna of the Stones' and that painting had pointed to a geometric circle with unique propensities—which we had christened as the 'PHI CIRCLE.' That is what this book had primarily been about. That wasn't the end though. We also discovered that Da Vinci had used 'rebus' to hide secrets within his works. 'Rebus' is an encoding technique where pictures are used to epitomize words, parts of words or number. This rebus had been hidden all over the Philosophers' Stone genre of texts. It wasn't long before we'd traced this same rebus throughout numerous other works in cultures spanning the globe. In this earlier book we had focused on the tantalizing Da Vinci secret of the PHI CIRCLE—which had been based on the number '26.' Undoubtedly, Da Vinci's secrets will lead the world to something big—like the geometric shape required to finally resolve the String Theory equations. String Theory asserts that there are more space dimensions than just the ones that humans can see and that those dimensions are folded-in. Physicists and mathematicians who study String Theory are looking for a geometric shape of the folded-in dimensions so that they can better predict how the vibrations of those unseeable dimensions will affect experiments. Da Vinci may have provided that geometrical shape and propulsion in his portrayal of the PHI CIRCLE. See if you agree! There actually are secret numbers in the Mona Lisa relating to the Fibonacci Sequence. There really is a secret hidden under a 'rose line' in the Madonna of the Rocks. There really are geometry and number secrets hidden in the Last Supper. There really is hidden rebus. This astounding book not only illustrates those secrets but it then dives deep into studying their implications, exploring the message that Da Vinci might have been seeking to convey. This book is a lighthearted take on what actually is an amazing and unprecedented revelation of REAL secrets that have been hidden in Da Vinci's artwork for hundreds of years. It is a must-buy for anyone who actually wants to know whether Da Vinci had a code and needs to know exactly what it was. Also, see more secrets in the 'Enigmatic Number '26,' in the ENCORE Series and in the Abridged Roundtable Booklet Series. If you want to better understand the PHI CIRCLE then also read the more recent books about the 'Philosophers' Stone.'
