Latino Gay Men and HIV: Culture, Sexuality, and Risk Behavior

Rafael M. Diaz

Latino Gay Men and HIV: Culture, Sexuality, and Risk Behavior Rafael M. Diaz

With research based on focus group and individual interviews in the United States, as well as a thorough and integrative review of the current literature, *Latino Gay Men and HIV* discusses the six main sociocultural factors in Latino communities -- machismo, homophobia, family cohesion, sexual silence, poverty and racism--which undermine safe sex practices. In an attempt to explain the alarmingly high incidence of unprotected intercourse in this population, this in-depth cultural and psychological analysis shows how an apparent incongruence between knowledge or intention and behavior can possess its own sociocultural logic and meaning.
