Care of the Person with Dementia: Interprofessional Practice and Education Dawn Forman, Dimity Pond

Care of the Person with Dementia responds to the urgent need for health practitioners to take an innovative approach to the challenge of dementia. The first Australian text of its kind, it combines evidence-based resources with interprofessional education and practice, exploring the ethical, social and environmental repercussions of dementia to provide a comprehensive overview of dementia care in an Australian context. The text is structured around a model of interprofessional education and practice (IPE) tailored to dementia care. This model incorporates the context of care, an important element missing from other recognised models of IPE. Throughout the book, principles of IPE are explained within the context of dementia, drawing on exemplars from a body of current, well-researched and evaluated dementia practice. Written by experienced academics, and providing national and international perspectives, this is a unique and crucial resource to develop collaborative skills and professional knowledge in the management of dementia.
