Digital Diversities: Social Media and Intercultural Experience (Post-Intercultural Communication and Education) Garry Robson

Digital Diversities is a groundbreaking interdisciplinary study of the social, social-psychological, philosophical and political ramifications of the 'digital turn' in human affairs. Focusing, in particular, on connections between the saturation of everyday life by digital communication technologies and 21st century global mobility, it offers fresh and original accounts of the interface between online communication practices and the negotiation of increasingly complex social experience. It provides critical studies of, among other things, the consequences of the widespread shift to remote rather than embodied relationships, the day-to-day management of intercultural encounters in unprecedentedly diverse social settings, new and emerging forms of political expression and cultural diplomacy, and the relationship between posthuman ideology and the 'googleisation of everything'. As such, Digital Diversities is a collection that makes a timely and thought-provoking contribution to the expanding field of studies of the abrupt, and still poorly understood, transformation of everyday life in the early 21st century by the gadgets and communication platforms of the digital global hive.
