It has allowed us to study the basic building blocks of the colourful world around us: the chemical elements. We have even been able to travel back in time and tell the story of the elements from its very beginning. It is a story which stretches over billions of years - a timescale that defeats our imagination. This book takes us on a brief journey through space and time to tell the story of the creation of the chemical elements. We will journey from the beginning of the universe to the evolution of stars and their final death.
